

Spirit Guides, Teachers & Light Identification

This popular course should be required for students that are studying healing, and all phases of mental and physical mediumship. There is truly a positive benefit in knowing the different spirit guides and their duties. During the course, if the student does not know the name of their guides, or what spiritual gifts they have, they will be identified to them by Revs. John & Kathleen. In many instances, proof messages of how, when and where the spirit guide was with the student, in their life, when they needed them most.

Also covered, are the detailed descriptions of the spirit light symbolism. By the size, shape, and color, a specific type of guide could be identified, as well as the type(s) of gifts the student may have. It should be noted that more detailed information is given on the subject of spirit guides, teachers and light identification, then in other courses such as Séance Etiquette.
